

Dcoder

اسم التطبيق: Dcoder

التصنيف: تطبيق مساند لطلاب

تقوم Dcoder بإنشاء منصة ترميز للجوال (IDE) للمبرمجين من جميع مستويات المهارة ليكونوا قادرين على البرمجة على الهاتف المحمول بأكثر من 35 لغة برمجة. الآن يمكنك البرمجة في أي وقت وفي أي مكان! باستخدام ، dcoder يمكنك تحسين مهارات حل المشكلات لديك من خلال المشاركة في تحديات Algo Yo. يحتوي IDE للهاتف المحمول من Dcoder على محرر رمز فريد يتمتع بنفس قوة سطح المكتب مع ميزات مثل تمييز بناء الجملة وتجميع الكود والمسافة البادئة التلقائية وما إلى ذلك.

أهم ميزة : يقدم خدماته بالعديد من اللغات ومن جميع دول العالم

رابط التحميل ios: [انقر هنا](#)

رابط التحميل android: [انقر هنا](#)

خطوات التسجيل في الموقع :

The registration process is shown in five sequential screenshots:

- Initial screen: "Don't have an account? Register" with social login options for Google (g) and Facebook (f), and an "OR" separator. Below is a field for "Enter your email address".
- Username input: "Enter username" with the text "Bod_i" entered.
- Email input: "Enter your email" with a field for "Enter your email".
- Name input: "Enter your name" with a field for "Enter your name".
- Password input: "Enter your password" with an empty field.

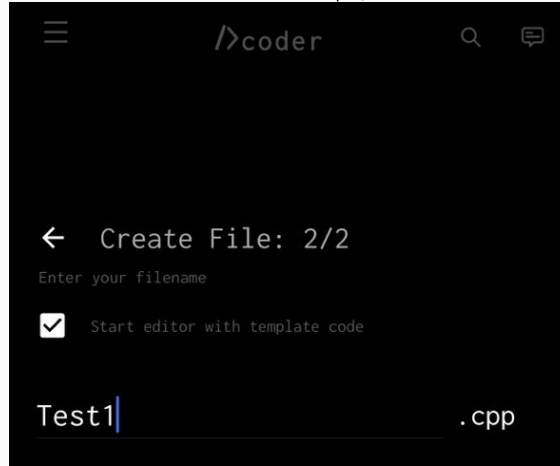

كيفية الاستخدام وتجربة لبعض الخصائص :

- بعد التسجيل في الموقع يتم اختيار اللغة المطلوبة لبدأ البرمجة

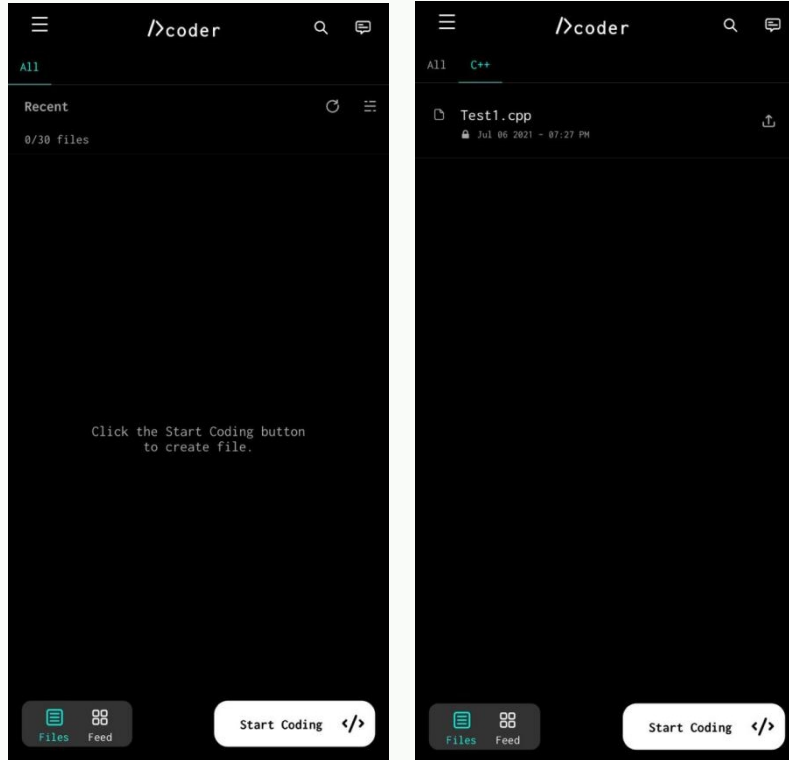

The screenshot shows a scrollable list of programming languages and their file extensions. The "Html/Css/Js" option is highlighted in red. Below the list is a "Next" button.

Language	Extension	Language	Extension		
Java	java	Kotlin	kt	Haskell	hs
C++	cpp	Brainf*ck	bf	VB.Net	vb
Python	py	go	go	Assembly	asm
Node JS	js	Swift	swift	Rust	rs
C#	cs	Common Lisp	lsp	Scheme	scm
Pascal	pas	Perl	pl	Elixir	ex
Objective-C	m	Scala	scala	F#	fs
Kotlin	kt	D	d	Tcl	tcl
Brainf*ck	bf	Groovy	groovy	Prolog	prolog
go	go	Clojure	clj	Erlang	erl
		Dart	dart		

- بعد اختيار اللغة ، ينشئ ملف ويتم تسميته:

- يتم حفظ الملف و لك الخيار ان تبدأ مباشرة في البرمجة أو في وقت آخر.

- تجربة كتابة كود بسيط بلغة ال C++ .

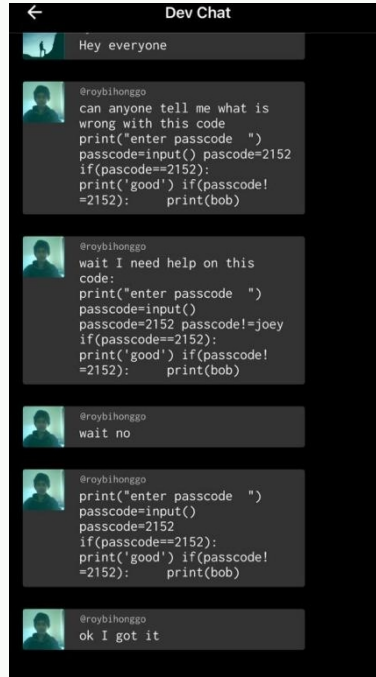

```
Test1.cpp Saved
#include <iostream>
using namespace std ;
int main(){
cout<<"Hi";
return 0;
}
```

```
Test1.cpp Saved
Title : Test
Description :
Tags :
1 #include <iostream>
2 using namespace std ;
3 int main(){
4 cout<<"Hi";
5 return 0;
6 }
Terminal
Hi
Process finished.
```

- من المميزات الموجودة أيضا ال live chat .

- ويوجد فيه مجال للتحديات تنقسم لثلاث أقسام (سهل و متوسط و صعب):

← Challenges 🔍

Easy Medium Hard

0%

Rotate Array Unsolved

You are given an array of N length. You have to rotate the array rightwards by K rotations, that is, shift each element to th...
